NON-COMMERCIAL CLEANER RECOMMENDATIONS

The commercially available cleaners listed above provide the best results for waterfree urinals but if they are not available to you, the following options can be used.

Vinegar and Hydrogen Peroxide – Mix equal parts (1:1) of white vinegar (5%) and hydrogen peroxide (3% solution). NOTE: if using this formula to clean stainless steel, be certain to thoroughly wipe the surface dry when finished.

Citric Acid – Mix 1 part citric acid to 20 parts water.

IMPORTANTE: Aplique el limpiador diluido apropiadamente, rociando sobre la superficie del orinal y limpiando con un trapo o esponja. Nunca aplique limpiador directamente al cartucho.
